

**CR Number:** 6093  
**External Reference:** SAFER CR 2797  
**Category:** XML Transactions  
**Component:** SAFER  
**Synopsis:** Modify T0031 schema file to allow new review data  
**Status:** Open  
**Disposition:** [2009-01-29] Discussed at ACCB.  
**Description:** [2009-01-15] Original submitted by Volpe.

Over the past 5 years, more data values have been added in MCMIS for REVIEW\_TYPE, REVIEW\_REASON\_NOT\_RATED, and REVIEW\_INVESTIGATOR\_CODE. Because these data value are not listed in the T0031 schema file, records containing these new values often fail the schema validation. This has caused the Volpe Operations Team lots of effort. The SAFER CR 2797 is created to modify the T0031 schema files to include the new values so that records containing these data won't fail again. Implementing the SCR will require all users downloading T0031 to update the schema when the SAFER team publishes it. Volpe will ask states about the potential lead time needed by the states and take it into consideration when determining the roll out schedule.

[2009-01-29] Discussed at ACCB meeting. Volpe will update to include 4th data element impacted. This SCR must be implemented to support the April 2009 release, so voting by ACCB is NA.
