

CR Number: 2936

External Reference: SAFER CR pending

Category: New data element needed

Component: CVISN Architecture and Standards

Synopsis: A source, other than the authoritative source, may submit e-screening enrollment data to SAFER. States requested a data element to track the source of the transponder data.

Summary: Any state can update e-screening information (XML T0024). States do not object to an unauthorized state submitting transponder information for another state, as long as the vehicle registration data is not affected.

Proposal: Add a data element to track the source of the transponder data.

Status: Recommended

Disposition: [2004-10-25] Recommended for FMCSA approval.

Description: [2004-08-23] At the teleconference on 2004-08-16 to discuss CR 2798, it was noted that any state can update e-screening information (XML T0024). States did not object to an unauthorized state submitting transponder information for another state, as long as the vehicle registration data is not affected. Washington requested a data element to track the source of the transponder data. This was also mentioned at the 2004-08-19 ACCB meeting.

[2004-09-27] Presented and discussed at the 2004-09-27 ACCB meeting. CR 2936 will be posted to the CVISN System Architects list serv for comments and will be voted on at the October ACCB.

[2004-10-25] Presented and discussed at the 2004-10-21 ACCB meeting. There were no dissenting votes so the CR was recommended for FMCSA approval.

Impact on architecture:
Change to CVIEW - SAFER XML interface at detailed level

Impact on documentation:
SAFER ICD

Impact on states:
If the information is just captured in a SAFER table, none.
If XML transactions are versioned to accept/report this data element, then states exchanging escreening data would need to use the versioned schemas and may need to change processing.
