

**CR Number:** 3671

**External Reference:** SAFER CR 306

**Category:** SAFER XML

**Component:** SAFER/CVIEW

**Synopsis:** Add CANU to GlobalType.xsd

**Status:** Open

**Disposition:** [2005-06-29] Open pending further discussion.

**Description:** [2005-06-21] SAFER CR 306  
This change request is created to address Call # 80885 initiated by Cambridge Systematics.

While processing data for the state of Connecticut, it was found the globalTypes.xsd file did not have one of the Canadian jurisdiction abbreviations: CANU for Nunavut.

The globalTypes.xsd needs to be updated to reflect this change.

[2005-06-29] Presented and discussed at the 6/23/05 ACCB meeting.  
This CR was submitted by CSI after the new Canadian jurisdiction code "CANU," for Nunavut, was found in data for Connecticut. Alana Gourneau (SD) offered to talk to CSI for further information / clarification of this CR. CR remains open pending further discussion.

[2005-08-02] Presented and discussed at the 7/28/05 ACCB meeting.  
Volpe noted that this should be addressed at the enterprise-level and changed in all FMCSA systems. Changes need to be coordinated within FMCSA as well as with the states. It was requested that schema changes coincide with software release dates and that states receive adequate notice, at least 30 days. Volpe will discuss with FMCSA and get back to ACCB.
