

**CR Number:** 4640

**External Reference:** CR 2555

**Category:** XML transaction processing time is too long

**Component:** SAFER/CVIEW

**Synopsis:** NE reports that it takes approximately 12-15 hours to process baseline XML transaction files due to XML tag overhead.

Summary: During discussion at the March ACCB meeting, states and Volpe suggested several alternatives for alleviating some of the transaction processing time problems.

Proposal: Recommend that FMCSA support further investigation by the developers into methods to alleviate the processing burden of exchanging data between SAFER and state CVIEWs.

**Status:** Recommended

**Disposition:** [2006-05-26] Recommended for FMCSA approval.

**Description:** During the March ACCB meeting, several comments were made as to the time it takes to process XML transactions. CR 2555 (Change the file size limit) was incorporated into this new CR.

State comments:

- XML tag overhead is hideous, carrying a lot of XML tags. Why not use on-demand on-call into the host system and not transport these files?

- Need a method of sending and receiving data so that files are not so big and rebaselining does not occur so frequently.

Volpe comments:

- SAFETYNET still uses flat files, but they will be phased out. FMCSA supports XML, not flat files.

- Suggest sending transactions as update instead of a refresh - only send fields that have changed instead of the whole record.

- Suggest that states filter out the records they don't want by using the subscription method.

[2006-04-25] Presented at the 4/20/2006 ACCB meeting.

The CR will be posted to the CVISN System Architects listserv for 30-day review and comment period. The creation of this CR was an action item from the previous ACCB meeting discussion. CR 2555 was linked to this CR in StarTeam as one of the possible solutions to alleviate the processing burden for CVIEWs. One state brought up the fact that CR2555 was completely different from this CR and suggested that the two CRs should be posted separately. APL explained that they were linked together, not incorporated as one, because both had to do with processing transactions.

[2006-05-26] Discussed at the 5/18/06 ACCB meeting.

The ACCB approved the recommendation that FMCSA support further investigation by the developers into methods to alleviate the processing burden of exchanging data between SAFER and state CVIEWs.
