

**CR Number:** 4764

**External  
Reference:**

**Category:** CVISN - National ITS Architecture

**Component:** CVISN Architecture and Standards

**Synopsis:** Eliminate distinction between wireline and wireless lines on CVISN Architecture Flow Diagram

**Status:** Recommended

**Disposition:** [2006-10-19] Recommended for FMCSA ECCB Approval.

**Description:** Different line types are used on the CVISN Architecture Flow Diagram to indicate Wireline (Fixed Point Communications), DSRC, Wide Area Wireless, and Other Transactions. The distinction between wireline and wireless communications is no longer of value for CVO applications.

Fix: Use a single line type for both wireless and wireline communications.

[2006-09-22] Presented at the 9/21/06 ACCB meeting.

Attendees recommended that this be approved. The CR will be posted to the CVISN System Architects' listserv for an additional 30-day comment period.

[2006-10-19] No dissenting comments. Recommended for FMCSA ECCB approval.

-----  
IMPACT SUMMARY:

ACCB Items:

1. CVISN Architecture Flow Diagram
2. CVISN Architecture Document (contains diagram)
