

CR Number: 4788

External Reference: SAFER CR 1386

Category: SAFER/PRISM

Component:

Synopsis: Transfer of Vehicle License Plate

Status: Closed Disapproved

Disposition: [2006-12-18] Closed - disapproved.

Description: Summary:

The business case is that a registrant transfers a license plate from a vehicle (vehicle A) previously in their fleet to a vehicle (vehicle B) that was not in SAFER already. Currently, changes to the SAFER Vehicle Registration Table differ, depending on whether the change was submitted via the CVISN XML or the PRISM PVF method.

When the transfer is made via the XML T0022 IRP Registration (Cab Card) transaction, SAFER updates the registration record for that plate by replacing the vehicle A registration data with vehicle B data. Vehicle A's registration data is no longer in any record. Therefore, a query using state/license plate number will return the one updated vehicle registration record that shows vehicle B's data.

When the transfer is made via the PVF method, a new registration record for vehicle B with the new license plate number is created. Thus, PRISM is able to access both vehicle registration records.

Proposal:

The CVISN/PRISM subcommittee of the ACCB recommends that SAFER be changed so that the processing for a license plate transfer via an XML transaction is the same as the processing for a transfer via PVF.

Rationale:

With the restructured SAFER tables and the anticipated capability of requesting subscriptions based on last update date, states will have the option of receiving both records or just the most recent record. (A new CR will be written to allow this selection via the subscription process. This would support SAFER CRs 50 and 1386.) Many states have said they want to see both records and let the roadside folks figure out which one is current, while other states say they only want to see the most recent.

[2006-12-18] Discussed at 12/14/06 ACCB meeting.

Volpe has determined that the current CVISN handling of vehicle license plate transfer is correct and PRISM will be changed. This CR is closed, disapproved.
